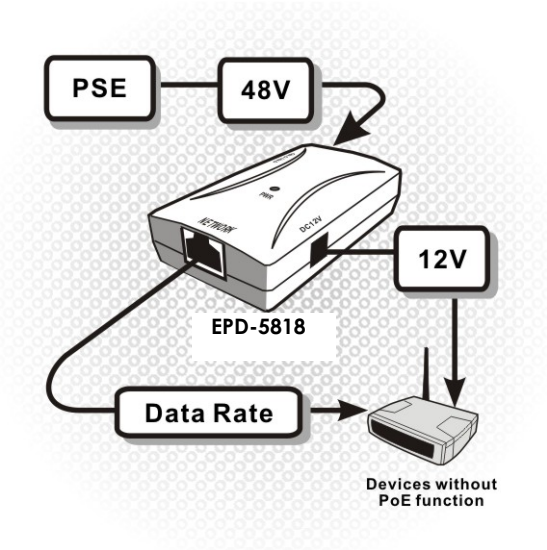
EPD-5818

PoE Splitter (802.3 af)

* Compliant to 802.3af standard PoE
* DC: 48V, 12V power out to the device
* For device that do not support PoE function.



PRODUCT DESCRIPTION

The EPD-5818 adopts PoE components to work as a power device. It provides PoE function to devices which have no built-in PoE function.

By supplying 48V from Power Source Equipment to EPD-5818, it will transfer into 12V power out and transmit data rate to devices without PoE function.

PRODUCT HIGHLIGHT

- The power supply can be centrally located where is can be attached to uninterruptible power supply
- Power can be supplied over long distance Power can be available wherever network access is available

PRODUCT ID & COSMETIC

Brick type mechanical design with power indicator (Red LED).
Dimension: 82 x 46 x 21mm

OPERATION ENVIRONMENT

Operation temperature: 0°C~ +60°C
Storage temperature: -40°C~ +80°C
Humidity: 5% ~ 95% typical
